To whom it may concern

It is my pleasure to write this letter of recommendation for Jesse Hart. He was in my ASTR 121 (Astronomy, Fall 2004) and PHYS199 (Connections, Fall 2004) classes. The astronomy and connection courses were for nonscience majors. The astronomy class had about 200 students and the connections class had only 25 students. I got know Jesse in the small connections class and through his visits to my office. He had excellent attendance and never missed a class.

All of his test scores in astronomy were among the top ten students in the class. His grade was A+ and you can't do any better than that. In the connection class he was always prepared and went the extra mile. His outstanding performance was a result of his academic ability and his desire to succeed.

Jesse has a pleasing personality so it is very easy to converse with him. He will succeed at what every he tries because he has the discipline and the academic ability. Without hesitation I strongly recommend Jesse Hart for financial support.
